

## Appendix B: Authorized Respirators

Updated: March 21, 2020

### The Authorized Respirators

FDA will add a respirator from [Appendix A](#) to the list of authorized respirators in **Appendix B** (below) upon submission of request from CDC, the manufacturer, or strategic stockpiler to FDA, as described in the Scope of Authorization Section of the Letter of Authorization (Section II), and based on FDA's review and concurrence, pursuant to the Conditions of Authorization in this EUA.

Respirator models beyond the manufacturer's shelf-life in this Appendix are covered by the EUA if stockpiled generally in accordance with the manufacturer-recommended storage condition and distributed under conditions of this EUA. Check the integrity of the respirator prior to use. For the most current CDC recommendations on optimizing respirator use, please visit [CDC's webpage: Strategies for Optimizing the Supply of N95 Respirators](#).
